632 Brucellosis of Cattle  
(Bang's Disease). BAI; ES

48 fr

It can be controlled, and most States now admit certified disease-free cattle. Guard against the disease; keep surroundings and equipment clean, vaccinate calves, slaughter animals that tests show to be affected or keep them away from others.

Single frame 1942  
Double frame 1942

628 Care and Repair of Farm  
Machinery. Mo. Ext. Service; ES

49 fr

Drawings show in detail how to properly fit, adjust, remove, replace implement parts; how to keep your engine working best. Good information crowds each frame, and the lecturer may wish to read from the screen. No notes go with the slidefilm.

Single frame 1942

637 Cattle Grubs, or  
Horn Flies. EP&Q; ES

33 fr

Only in its grub stage, at the end of its 9-month journey through the animal's body tissues, can you destroy this pest. Here you see various controls applied, some best for farm herds, others for range. You also see seasonal and life cycles, attack on cattle and their defense, close-ups, distribution.

638 Finding Minutes. 43 fr  
ES; N. J. Ext. Service

A slidefilm of drawings. If you are losing time and zest in your homemaking, the opening frames remind you where you may be at fault; the rest show that planning your work and knowing the right thing to do, be it large or small, indoors or out, frees you for health, leisure, fellowship.

640 First Things First. 25 fr  
SCS; ES

Companion to No. 639, on contouring, this slide-film shows how the grassing of waterways controls erosion. Contouring holds run-off on land of gentle slope; grassed waterways direct it on greater slopes.

Single frame 1943

624 Men for Defense!  
CCC; SCS; FS; ES

71 fr

In the wide range of training and experience that youth gained in CCC camps they saved much of the Nation's wealth and added to it. CCC camps produced reserve manpower for farm and shop, defense and war. "Rehearsal for Defense," reprinted from Soil Conservation, vol. VII, No. 2, August 1941, goes with the slidefilm.

132 Milk Quality Improvement in 40 fr  
4-H Dairy Clubs. BDI; ES;  
N. J. Ext. Service

Through organized clubs and under the guidance of dairy specialists and extension agents, 4-H Club members learn how to use sterile utensils and equipment, how to practice cleanly methods in handling milk, and how to make tests. Improve milk consumption by improving its quality.

619 Neighborhood Leaders Mobilize; 50 fr  
the Farm Front. ES

A million farm people become neighborhood leaders through training by specialists from the colleges of agriculture. Through meetings and home calls they pass on to their neighbors the Government's wartime needs and lead them in meeting the call.

The first of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased. The weather was very much increased, and the ice was very much increased.

The second of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased.

The third of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased.

The fourth of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased. The weather was very much increased, and the ice was very much increased.

The fifth of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased.

The sixth of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased. The weather was very much increased, and the ice was very much increased.

The seventh of the year was a very cold one, and the weather was very disagreeable. The wind was very strong, and the rain was very much increased. The snow was very much increased, and the ice was very much increased.

335 History and Development of 57 fr  
Agricultural Implements  
and Machinery. AC&E; ES

Charts, drawings, readers, photographs, topically arranged, trace through the human-, animal-, and mechanical-power eras the development of implements and machines used on the farm.

Single frame Revised 1942

E-6a m-3 r

259 Home Demonstration Agent, The; 37 fr  
Friend to Farm Women. ES

An account of the many kinds of help the best friend to farm women is prepared to give daily to lighten and brighten the farm woman's life. Indoors and out, individually and socially, women on the farm find life more interesting and satisfying because of the home demonstration agent.

Single frame Revised 1941

634 Gardening for Victory, Part I, 42 fr  
Planning and Planting the Farm  
Garden. ES; BPI

Each member of the Jones family has a part in growing their Victory Garden. Maples in bloom tell us when work begins. We see how Dick treats the seed to guard against plant diseases; how deep he plants and how far apart; how Jane protects seedlings from insects; how they grow more than one crop on the same plot. Slidefilm No. 635 will carry the story to its close.

Single frame 1943  
Double frame 1943

635 Gardening for Victory, 57 fr  
Part II, The Farm Garden  
Brings Results. ES; BPI

The Jones family Victory Garden that Slidefilm No. 634 showed us how to plant now is growing fine. Dick and Jane carefully tend it. We see how they serve dust and poison to insects when they show up; how they keep their plants well; how they keep down weeds; the crops they have in the end for canning and storing.

Single frame 1943  
Double frame 1943

199 Chestnut Blight. BPl; ES

49 fr

Federal and State authorities detect symptoms and cooperate to wipe out the disease and prevent its spread on the Pacific coast. In the eastern United States blight killed the commercial stands. Bureau of Plant Industry experiments with species of disease-resistant Asiatic chestnuts and hybrids.

Single frame Revised 1941

E-6bj m-1 m-3 nr

639 Contoured Acres Fight.  
SCS; ES

30 fr

Farm on the level and save water, fertilizer, soil. Your contoured acres will grow more crops; this means more food, supplies, clothing for the home and the war fronts. This slide-film carries the story without lecture.

Single frame 1942

E-6ab b-1 fj m-3 r

171 Diagnosis of Bee Diseases  
in the Apiary. E&PQ; ES

58 fr

Understand the symptoms and often you can make correct diagnosis of bee diseases in your apiary. Here we see in detail various steps and means to control bee diseases and parasites.
